BUSTED!

"No one is equal to anyone else, no race is equal to another race, no country is equal to another country. Egalitarianism is based on a false political premise that has no foundation in the real world. ... Gnosticism has an aristocratic vision, (from the word Aristos meaning best), it is hierarchical and elitist. Even within the Gnostic traditions there are divisions of knowledge, degrees of awareness and a double doctrine, whereby on outer wisdom is taught to the world (exoteric) and the inner truth is reserved for the initiated (esoteric)."

"There is an additional kind of narcissism reflected in Christian Science: collective, or group, narcissism. ... Discovered and documented by Sigmond Freud, called "Freud's Theory of Collective Narcissism," he noticed that some groups developed "in-group bias" where they preferred and elevated their group's thinking and biases above others. For example, ... sorority, and fraternity members' superiority complex, and even extreme homeschool families who feel this is the only way to properly educate children."

"The most controversial aspect of The Work is Gurdjieff's evaluation of man. Simply put, man does not have a soul ! The soul is acquired through perseverance and effort. This comes as a shock to many used to exoteric religious traditions (and the pseudo philosophies of the New Age), however, it is inherent within all great esoteric frameworks. Ordinary people are machines, or in Gurdjieffs inflammatory language, ordinary people are no better than shit."

"George Ivanovich Gurdjieff (c. 1866–1877 – 29 October 1949) was a philosopher, mystic, spiritual teacher, composer, and movements teacher.

Gurdjieff taught that people are not conscious of themselves and thus live their lives in a state of hypnotic "waking sleep", but that it is possible to awaken to a higher state of consciousness and serve our purpose as human beings. His student P. D. Ouspensky referred to Gurdjieff's teachings as the "Fourth Way"."

"Early indoctrination in the belief in homo economicus attempts to transform humans into soulless machines. In particular, for many Autists, and possibly for everyone, the more we have an ability to relate to other humans and non-human living beings the less we are able to conduct transactional busyness."
